| 8 | 501 | 41 | 30 | 73.17% | 78 | 56 | 71.79% |
| 9 | 602 | 125 | 107 | 85.60% | 286 | 228 | 79.72% |
| 10 | Total | 337 | 262 | 77.74% | 671 | 518 | 77.20% |

Notes:

301 has one owner how works for city and want to stay impartial

405 has 4 units that are for sale / estate , no one available

408 is NEW Construction and has limited occupants

602 has 129 lots, but only 125 homes on those lots

September _____, 2021

Attn: City of Saskatoon Planning Department:
Anastasia Conly
Darryl Dawson
Councillor Mairin Loewen - Ward 7 City of Saskatoon

For the current 250+ Homes/Units and 710+ residents, The Willows Golf and Country Club community was designed, approved, marketed and SOLD to us all, as a "unique category of residential development" within a golf course community that provided very restricted commercial uses, architectural controls, lower density housing, restrictions on population and larger than conventional residential sized lots.

These controls for the Saskatoon Willows Golf and Country Club community are set out in the City of Saskatoon's Zoning Bylaws #8770 in section 13.4 - Direct Control District 4 (DCD4).

The Official Community Plan, which also references the uniqueness of Direct Control Districts was reconfirmed unanimously by Saskatoon City Council in June of 2020 and the Saskatchewan provincial government in August of 2020.

As a Willows homeowner and resident, I am opposing any changes to Bylaw 8770 that would alter section 13.4 and more specifically allow for any changes that would affect the traffic flow / amounts on Cartwright St, commercial definitions or alter the designated locations of the land uses as defined on MAP No. 1 in section 13.4

We love our peacefully quiet and unique neighborhood

Please, keep our loved community as a peacefully quiet and unique residential community as was sold to us and promised in 2003 and again affirmed by City Council in June of 2020!

Yours truly,

Darryl Dawson
Councillor Mairin Loewen - Ward 7 City of Saskatoon

For the current 250+ Homes/Units and 710+ residents, The Willows Golf and Country Club community was designed, approved, marketed and SOLD to us all, as a "unique category of residential development" within a golf course community that provided very restricted commercial uses, architectural controls, lower density housing, restrictions on population and larger than conventional residential sized lots.

These controls for the Saskatoon Willows Golf and Country Club community are set out in the City of Saskatoon's Zoning Bylaws #8770 in section 13.4 - Direct Control District 4 (DCD4).

The Official Community Plan, which also references the uniqueness of Direct Control Districts was reconfirmed unanimously by Saskatoon City Council in June of 2020 and the Saskatchewan provincial government in August of 2020.

As a Willows homeowner and resident, I am opposing any changes to Bylaw 8770 that would alter section 13.4 and more specifically allow for any changes that would affect the traffic flow / amounts on Cartwright St, commercial definitions or alter the designated locations of the land uses as defined on MAP No. 1 in section 13.4

We love our peacefully quiet and unique neighborhood

Please, keep our loved community as a peacefully quiet and unique residential community as was sold to us and promised in 2003 and again affirmed by City Council in June of 2020!

Yours truly,

Councillor Mairin Loewen - Ward 7 City of Saskatoon

For the current 250+ Homes/Units and 710+ residents, The Willows Golf and Country Club community was designed, approved, marketed and SOLD to us all, as a "unique category of residential development" within a golf course community that provided very restricted commercial uses, architectural controls, lower density housing, restrictions on population and larger than conventional residential sized lots.

These controls for the Saskatoon Willows Golf and Country Club community are set out in the City of Saskatoon's Zoning Bylaws #8770 in section 13.4 - Direct Control District 4 (DCD4).

The Official Community Plan, which also references the uniqueness of Direct Control Districts was reconfirmed unanimously by Saskatoon City Council in June of 2020 and the Saskatchewan provincial government in August of 2020.

As a Willows homeowner and resident, I am opposing any changes to Bylaw 8770 that would alter section 13.4 and more specifically allow for any changes that would affect the traffic flow / amounts on Cartwright St, commercial definitions or alter the designated locations of the land uses as defined on MAP No. 1 in section 13.4

We love our peacefully quiet and unique neighborhood

Please, keep our loved community as a peacefully quiet and unique residential community as was sold to us and promised in 2003 and again affirmed by City Council in June of 2020!

Yours truly,

Councillor Mairin Loewen - Ward 7 City of Saskatoon

For the current 250+ Homes/Units and 710+ residents, The Willows Golf and Country Club community was designed, approved, marketed and SOLD to us all, as a "unique category of residential development" within a golf course community that provided very restricted commercial uses, architectural controls, lower density housing, restrictions on population and larger than conventional residential sized lots.

These controls for the Saskatoon Willows Golf and Country Club community are set out in the City of Saskatoon's Zoning Bylaws #8770 in section 13.4 - Direct Control District 4 (DCD4).

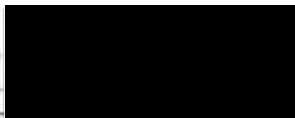

The Official Community Plan, which also references the uniqueness of Direct Control Districts was reconfirmed unanimously by Saskatoon City Council in June of 2020 and the Saskatchewan provincial government in August of 2020.

As a Willows homeowner and resident, I am opposing any changes to Bylaw 8770 that would alter section 13.4 and more specifically allow for any changes that would affect the traffic flow / amounts on Cartwright St, commercial definitions or alter the designated locations of the land uses as defined on MAP No. 1 in section 13.4

We love our peacefully quiet and unique neighborhood

Please, keep our loved community as a peacefully quiet and unique residential community as was sold to us and promised in 2003 and again affirmed by City Council in June of 2020!

Yours truly,

Darryl Dawson
Councilor Mairin Loewen - Ward 7 City of Saskatoon

For the current 250+ Homes/Units and 710+ residents, The Willows Golf and Country Club community was designed, approved, marketed and SOLD to us all, as a "unique category of residential development" within a golf course community that provided very restricted commercial uses, architectural controls, lower density housing, restrictions on population and larger than conventional residential sized lots.

These controls for the Saskatoon Willows Golf and Country Club community are set out in the City of Saskatoon's Zoning Bylaws #8770 in section 13.4 - Direct Control District 4 (DCD4).

The Official Community Plan, which also references the uniqueness of Direct Control Districts was reconfirmed unanimously by Saskatoon City Council in June of 2020 and the Saskatchewan provincial government in August of 2020.

As a Willows homeowner and resident, I am opposing any changes to Bylaw 8770 that would alter section 13.4 and more specifically allow for any changes that would affect the traffic flow / amounts on Cartwright St, commercial definitions or alter the designated locations of the land uses as defined on MAP No. 1 in section 13.4

We love our peacefully quiet and unique neighborhood

Please, keep our loved community as a peacefully quiet and unique residential community as was sold to us and promised in 2003 and again affirmed by City Council in June of 2020!

Yours truly,

Darryl Dawson
Councillor Mairin Loewen - Ward 7 City of Saskatoon

For the current 250+ Homes/Units and 710+ residents, The Willows Golf and Country Club community was designed, approved, marketed and SOLD to us all, as a "unique category of residential development" within a golf course community that provided very restricted commercial uses, architectural controls, lower density housing, restrictions on population and larger than conventional residential sized lots.

These controls for the Saskatoon Willows Golf and Country Club community are set out in the City of Saskatoon's Zoning Bylaws #8770 in section 13.4 - Direct Control District 4 (DCD4).

The Official Community Plan, which also references the uniqueness of Direct Control Districts was reconfirmed unanimously by Saskatoon City Council in June of 2020 and the Saskatchewan provincial government in August of 2020.

As a Willows homeowner and resident, I am opposing any changes to Bylaw 8770 that would alter section 13.4 and more specifically allow for any changes that would affect the traffic flow / amounts on Cartwright St, commercial definitions or alter the designated locations of the land uses as defined on MAP No. 1 in section 13.4

We love our peacefully quiet and unique neighborhood

Please, keep our loved community as a peacefully quiet and unique residential community as was sold to us and promised in 2003 and again affirmed by City Council in June of 2020!

Yours truly,

Signature:

Councillor Mairin Loewen Ward 7 City of Saskatoon

The Willows was designed, approved, and marketed as a residential golf course community with very restricted commercial uses.

These controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan.

As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighborhood. Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council!

Yours truly,

RE: THE WILLOWS CONCEPT PLAN AMENDMENT

I am a resident of Windermere Villas, 301 Cartwright Terrace. I am opposed to Dream Development's Proposed Concept Plan Amendment for The Willows. In particular, I strongly object to the City expanding permitted commercial uses to allow a hotel to be built in our neighbourhood.

Yours truly,

City of Saskatoon

Dear Councillor Loewen:

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses.

These controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan.

As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighborhood. Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council!

Yours truly,

[Redacted]

Date: Sept 6/2021

Councillor Mairin Loewen, Ward 7
City of Saskatoon

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

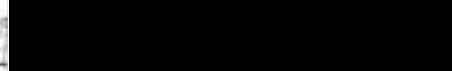

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

Councillor Mairin Loewen, Ward 7
City of Saskatoon

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Dear Councillor Loewen:

Further to our letter of January 13, 2021, Dream's amended plan for Willows continues to contain several concerning features to which we again strongly object.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

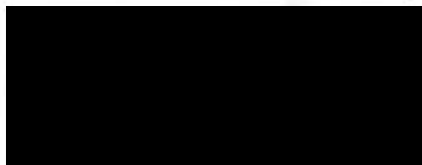

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

As stated in our previous letter, if these amendments are approved, the commercial interests of the developer, are being put ahead of the interests of the existing residents who bought into the original concept plan, a plan which was being sold to us by the very same developer now requesting these amendments. This brings into question the trustworthiness, reliability and integrity of not only the developer but also City who has ultimate authority in approving these plans. Approvals which should consider the rights and interests of residents and the responsibility to hold developers accountable for the commitments made to these same residents in their development plans. The city's approval in favour of the developer and the substantial changes being requested, sets a dangerous precedence for the City's reputation for protecting the interests of individual residents over those of a developer from which the City does not maintain an arm's length relationship.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

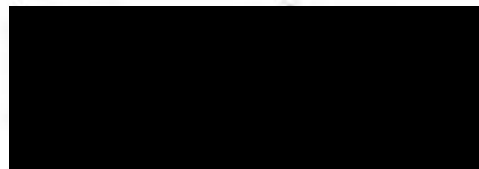

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

Councillor Mairin Loewen, Ward 7
City of Saskatoon

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

Councillor Mairin Loewen, Ward 7
City of Saskatoon

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

City of Saskatoon

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

Dear Administrators,

I just want to voice my opposition for Dream's amended plan for the Willows neighborhood. We acquired our lot and built in 2010 with complete understanding that there would be a Phase 2 with its original design. I can also understand in 11 years there may be some tweaks necessary, but now we see there are material changes that will definitely impact the desirability of our neighborhood and no doubt negatively impact our property values. Here is a short list of our misgivings and opposition to the proposed amendments by Dream.

- We invested in a quiet and peaceful, upscale community. Now we appear to be going in the direction of commercial use properties, hotels and more shops. We already have plenty of these options nearby in Stonebridge. It is our understanding the City zoning bylaw DCD4 states the Willows is a "residential development" – not a "commercial development".
- These amendments will mean a 137% increase in population for Phase 2 (from 722 to 1713 residents). This means more traffic, more noise, lower pedestrian safety, increased light and air pollution!
- Currently the Willows is a 'bare-land condominium. Changing Phase 2 to "fee-simple" properties will create tax and service inequities that will result in reduced property values for Phase 1 property owners.
- The original plan called for minimal impact on Phase 1. The proposed amendments will create huge increases to traffic flows on Cartwright. The proposed plan also impacts the sight lines for a large number of Phase 1 residents – again negatively impacting our property values.

I sincerely ask you kindly oppose this proposed amendment. Thank you for your consideration.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Your truly

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

Councillor Mairin Loewen, Ward 7
City of Saskatoon

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

Dear Councillor Loewen:

Dream's amended plan for Willows contains several concerning features.

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses, lower density housing, a 27-hole golf course (with accompanying green space, trees and wildlife), architectural controls, condominium corporations, restrictions on future housing development to the west of the Clubhouse for a population increase of 722, traffic volumes that would match the capacity of the streets, and the preservation of premium views of the golf course for many residential and condominium homes.

Dream's amended plan removes these features that were promised to residents of Willows. If approved, the amended plan would result in greater commercial development (including a hotel), a much larger population increase of about 1700, large volumes of traffic, no architectural controls, higher density housing, loss of green space and trees, destruction of premium views, and an illogical combination of fee-simple and condominium-based housing.

The commercial controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan (OCP). As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighbourhood and any changes to the OCP concerning golf course communities.

I also support the original 2003 plan for Willows' Phase 2 development. The City should reject Dream's proposed amended plan until such time that Dream is willing to submit something that is not such a radical departure from the 2003 plan.

Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council.

Yours truly,

Councilor Mairin Loewen

Ward 7

City of Saskatoon

Dear Councilor Loewen:

The Willows was designed, approved and marketed as a residential golf course community with very restricted commercial uses.

These controls for a Saskatoon golf course community are set out in DCD4 of the Zoning Bylaw and were recently reconfirmed by City Council approving the updated 2020 Official Community Plan.

As a Willows resident, I oppose any changes to the Bylaw that would allow expanded commercial development in our neighborhood. Keep our community as a quiet residential community as promised in 2003 and again in 2020 by City Council!

Yours truly,

Print Name: GAIL M OLLENBERGER
