Subject Proposed City of Saskatoon Restrictions

Meeting (if known) October 29

Comments

I am writing in regard to the proposed Covid restrictions that the City of Saskatoon will be meeting in regard to today. I am a citizen of Saskatoon that opposes the proposed restrictions that the city is considering. Normally, the restrictions being proposed are passed at a provincial level. If the province has not taken this step, I am questioning why the city of Saskatoon thinks that they have better knowledge in this regard. Please understand the following:

- survival rate from covid Canada wide is 99.92%. With such a high survival rate, it does not seem reasonable to go to such extreme measures as you are proposing when our community is already to much divided on this issue.
- you should be taking steps to unite our community, not divide.
- as of yesterday, the province had 53 available ICU beds. This is not a pandemic as extreme as it is being made out to be.
- the media is fear mongering and providing only one side to the story. Doctors are being silenced and when they try to speak out, are being reprimanded (refer to Dr. Christian). It would seem worthwhile and certainly needed for you to hold a public debate with "experts" or doctors on both side being allowed to speak freely without concern for losing there jobs.
- why is not natural immunity being recognized, just like vaccination? Why has antibody testing been restricted and not allowed?

- why are doctors not being permitted to use safe medication to treat covid (for example, ivermectin)? Why is the media portraying ivermectin as a horse dewormer? It is censoring the truth, that it is a safe, effective treatment for HUMANS and has won a noble peace prize. Countries such as India have had much success. Why are these treatments being ignored?
- people are losing jobs because of the mandates or are being forced to test. Does this seem right to you, again with such a high survival rate? We are told medical professionals are stressed - has anyone considered the fact that they are being forced to vaccinate and that is playing a major part of the issue? Again, why no debate?
- have you researched and looked at VAERS? There are many side effects and deaths which are being silenced. Do you know the truth? Do you want to enforce restrictions knowing there are adverse reactions to the vaccine? What will be the legal ramifications should citizens have a major reaction or worse, death? Will the city take responsibility for those injured who took the steps to be vaccinated so they could participate in normal everyday life events?
- are you aware of the heart issues in children and especially young males? Does the city want to promote a cause with such a detrimental effect on our young citizens? Again, check VAERS.
- Does the city of Saskatoon want to support the illegal vaccine passports? Are you willing to break the law?
- Are you in favor of creating more division and segregation in society?

This is an urgent matter, please do NOT go forward with the proposed restrictions. They will cause more harm, than good. Stop trying to push something that the province knows is not right.

Thank-you
