Subject Item 8.1.2 Curbside Organics Program Update

Meeting (if known) SPC-EUCS on January 10, 2022

Comments

From the Information Report:

"Other municipalities suggested that the best form of resident feedback is to survey residents following a year of having the service. The Administration can also analyze set-out rate and tonnage in the winter months to determine if there are program savings from adjusting collection frequency in the winter months."

From Appendix 1:

"The research showed that there are very few examples of a City that provides biweekly year-round collection frequency for organics."

I propose that resident feedback be gathered now with the current subscription program. Taxpayers that already pay for this service would be excellent residents to gather feedback from. I subscribe to the Green Cart Program. The last pickup for my green bin was on November 1st. It has been over 2 months now and my green bin is almost 1/4 full with food waste. Before I start filling my green bin with yard waste in the spring, I would be happy to participate and advise the City on the status of organics in my bin. I do not support bi-weekly year-round collection as my green bin does not fill up over the winter.

Thank you,
Sherry Tarasoff
