Re. Proposed Tree Protection Bylaw

SOS Trees Coalition <http://www.sostrees.ca/> works in partnership with the City of Saskatoon, community organizations, private citizens and local media, to enhance and expand the impact of tree education through citizen involvement both at the individual and public policy level.

We know that trees are a major asset of the City and are important to help reduce the impact of our changing climate, reduce the heat dome effect, and enhance the quality of life for all of our citizens.

We urge the Council to fully support the proposed Tree Protection Bylaw. We believe that the Tree Protection Bylaw when implemented will improve the City of Saskatoon by protecting our existing trees and expanding our forest canopy making the City more sustainable.

In addition we urge the Council to proceed with the pilot management plans for the Small Swale & Richard St. Barbe Baker Afforestation, approve the sustainable food forest pilot as well as the sustainable street garden expansion. Each of these initiatives help Saskatoon to address the changing climate and make the City more sustainable.

We appreciate the City's time and effort to move forward with these initiatives that will ensure a future for our urban forest and help the City continue to be a livable place for future generations. We look forward to a greener and more sustainable Saskatoon.

Linda Moskalyk,
President
SOS Trees Coalition
