Re: your Financial Deficit Responsibility.

I would say, figure out how to downsize your programs, services and support staff. Keep your admission rates to fitness centers and pools low so more people will use the facility. I think your revenue will increase if you raise prices and usage will increase.

Suspend/stop the building of the new library and convention center.

Lower your tax burden on your citizens; their money is being pulled away everywhere in this recession. Put more money in your citizens' pockets.

In order to revive your downtown core, increase your support of business by stopping your parking meter concept and change this to a 3 hour time limited parking zone as some tourist cities in this continent do. People repeatedly tell me that they never shop downtown because of parking costs and lack of personal safety issues. Also, your parking meter push pads also wear out and need replacing. I did report that last fall of 2022 to the supervisor of parking.

I like the green bins but they can also "heat" with decomposition! This can be a fire hazard.

You could take away my blue bin. I always managed to get blue bin items to the recycle area at Louisa Civic Centre with no problem.

Someone who had lived in Calgary when these green bins began there, said that skunks were attracted to their area especially if a person actually ~~ripped~~ the bin and dumped it on the grass/ground.

my thoughts.  
Yours truly,  
Czesław Kukiwski

P.S. I attended the event at Woodlawn Cemetery on June 18<sup>th</sup>. It was wonderful. I am wondering how the entrance to the next of Kia Memorial Mile will be made to look more presentable (where the former bakery site was) are there plans to beautify this somehow?
