Comments:

This is a fantastic idea. It represents a low cost way of dramatically improving the safety of cyclists in Saskatoon. It will tend to reduce vehicle traffic on the designated bike way streets and slow the traffic that does use these streets. The streets that are designated for this have been well selected and are not the major vehicle streets. This approach will be much less expensive and have a much greater impact than spending money on concrete curb extensions that theoretically slow traffic, but tend to force cyclists into the traffic when the road is narrowed. Great job whoever came up with this idea!
