What meeting do you wish to speak/submit comments ? (if known): Freeway construction through the North east swale

Comments:

The north east swale is home to a wide range of biodiversity. Few natural areas like the swale exist in and around Saskatoon and habitat loss is already the number one driver of species decline. If Saskatoon is committed to being green and supporting biodiversity, building a freeway directly through integral habitat is definitely not accomplishing that. I would strongly suggest tabling the development of this roadway. Please consider the above information.

Sincerely,
Samantha Morrice, MSc.
