To the Standing Policy Committee on Transportation,

I feel that great cities are places that invite all citizens to move safely from neighbourhood to neighbourhood regardless of their mode of transportation. Every step that the City of Saskatoon can make toward expanding a

baseline network of safer routes, where people can get around in a safer manner, is a good step.

Before you are two items of business that I believe represent these kinds of good steps.

Regarding item:

7.1.1: Connecting 2nd Avenue/3rd Avenue: Walking, Cycling, and Driving Improvements [TS2024-0504], I support Option 2A – Widen to the West.

It seems that option 2A is the one that lines up with the planning the city has done. I feel that pedestrian actuated signals and a separated shared-use path are great features that will enhance this area of the city and make it much safer for pedestrians and cyclists.

Regarding item:

7.1.2: Opportunities for Rapid Deployment of Safety Improvements on Active Transportation Routes – May 2024 Update [CC2023-0602, TS2023-1003, TS2023-1204], I support Option 2: Implement a Neighbourhood Bikeway using Rapid Deployment on Route 6.

I believe a bikeway along Route 6 (Munroe Avenue) would offer more access to campus for active transportation users with a wider range of abilities and theoretically could reduce University traffic congestion in general, and at College and Wiggins in particular.

Please represent the people of Saskatoon by supporting these items.

Thank you for your consideration.

Maureen Junk
