Comments:

I am writing to you to urge the City of Saskatoon to adopt the National Building Codes Tier 2 standards for energy use efficiency in 2025 and Tier 3 in 2026. This is a necessary response to urgent environmental threats and it will also improve public health and livability. If we fail to address climate change and do not reduce fossil fuel use, we will only pay more in the future due to climate disasters.

Tier 2 and 3 building codes are an investment in Saskatoon's future. The climate crisis demands action now. Thank you for considering this important matter.
