Comments:
With regards to the report on the downtown Protected Bike Lane Demonstration Project that will be submitted to the Standing Policy Committee (SPC) – Transportation on November 6th, I respectfully request an opportunity to speak to the Committee on this issue on behalf of the Office of the Chief Medical Health Officer, Saskatoon Health Region.

Saskatoon Health Region's Population and Public Health practitioners, including the Office of the Chief Medical Health Officer, have been pleased to be engaged and consulted throughout the conceptualization, planning and implementation phases of this project.

Health begins where we live, learn, work and play. Neighbourhood design that includes available, efficient, and safe multi-modal transportation options increases community wellbeing and quality of life. Projects that support active transportation, such as this one, re-envision how we move around our community, connect with each other and access amenities.

As public health physicians and on behalf of Population and Public Health as a whole, we applaud Administration, Committee and Council support for this project to date. We encourage the SPC-Transportation Committee and Council to accept and take action on the recommendations in the report.

Sincerely,
Julie Kryzanowski, MD, CCFP, FRCPC, MSc
